The humanists, represented at the highest levels of government and society by the Fabian Society, believe in their cause. And they know where to take the battle to be most effective—the **classroom**. Their logo says it all—a wolf in sheep's clothing! They work by deception and **lies** to promote the 'faith of humanism'.

It is easy to detect a religious, even 'evangelistic', fervour in the writings and activities of the humanists but they are deceived in their own deception. Unfortunately the sheep's clothing disguise has beguiled many people and they have gained dominance in many classrooms. **The battle between Scripture and Ethics classes brings it into stark relief.**

**This fervour needs to be replicated by those of us who hold in our hands the Word of Truth. If we believe it is the Truth then we should be no less driven by an evangelistic zeal and we should be engaged in the battle in the classrooms of the nation.**

**Choices of Life is in classrooms bringing the unchangeable truth of the sanctity of human life.** And the battle lines are clearly defined. It takes constant persistence to get appointments to speak to students, even in the Christian and Catholic schools! I wonder if the humanists are keeping school teachers and administrators so busy with bureaucratic nonsense that they don't have time to think about the big issues nor about the children that are inadvertently being subverted by the 'wolf in sheep's clothing'.

## Are the Humanists Right?

The logo of the Fabian Society—a wolf in sheep's clothing

One devout humanist wrote: *"I am convinced that the battle for humankind's future must be waged and won in the **public school classroom** by teachers who correctly perceive their role as the proselytizers of a new faith; a religion of humanity that recognises and respects the spark of what theologians call*

*divinity in every human being. These teachers must embody the same selfless dedication as the most rabid fundamentalist preachers, for they will be ministers of another sort, utilizing a classroom instead of a pulpit to convey humanist values in whatever subject they teach, regardless of the educational level—pre-school day care or large state university. **The classroom must and will become an arena of conflict between the old and the new—the rotting corpse of Christianity, together with all its adjacent evils and misery, and the new faith of humanism ..."** (Dunphy, *A A religion for a new age*, The Humanist Jan-Feb 1983, 23, 26 as quoted in Creation Ministries Update February 2010)*
