

THE CHOICES OF LIFE

INC.

An interactive
SCHOOL PRESENTATION
on the facts and choices
surrounding the beginnings
of human life

The unique 'CHOICES OF LIFE' program was developed over 10 years by Bruce Coleman. A school teacher for over 30 years, Bruce holds an MA in education as well as qualifications in special education.

His live classroom presentations are scientifically accurate and involve students in a learning experience designed to encourage them to think for themselves and to make fully informed choices.

The entire program is basically non-religious but some schools may request religious aspects. Both formats can be readily accommodated.

As young Australians embark on their adult lives and begin relationships, they deserve to know the scientific facts, ethics and attitudes surrounding the commencement of human life.

When considering options and making decisions regarding pregnancy and pregnancy termination, our young Australians are confronted today with ignorance, misinformation, varying social attitudes and political correctness. Properly aware of the facts they will be better equipped to make fully informed decisions in these life impacting circumstances.

Australian
ABORTIONS are approaching
100,000 per year
(nearly 2000 per week)

The Program

YEARS 5 - 7

The one-hour program provides factual information on the wonder of human life before birth. It instills a value of life at this formative stage of the student's development. **The presentation does not include any mention of abortion.**

YEARS 9 - 12

One-hour graded presentations provide senior classes with factual information on pregnancy development and logical discussion on ethical and responsible decision making. It includes the latest scientific information on abortion as well as its potential impact on physical/psychological health and relationships.

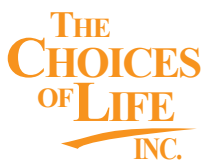

We need your help to grow

This unique presentation is already highly recognised by over 250 Catholic, Anglican, Christian and Public schools throughout New South Wales and is expanding across Australia.

Only such an interactive classroom presentation maximises both the learning experience - and personal impact - of this important and relevant life message.

With your help the program can be greatly expanded to reach even more schools in every state and territory.

Our aim is to train and equip an increasing number of committed teachers, working part time, to meet the growing demand as the program expands school-by-school, state-by-state.

Choices of Life is a non-profit, non-sectarian organisation. It aims, with your help, to assist, educate and equip Australian young people to more ably consider, analyse and make pro-life choices concerning relationships, drug use, pregnancy, abortion and youth suicide.
